United States: National Rifle Association (NRA)

https://www.theverge.com/2021/10/6/22712250/twitch-hack-leak-data-streamer-revenue-steam-competitor

Exploit: Ransomware

NRA: Gun Rights Activist Group

Risk to Business: 1.417= Severe

Guess who's back? Cybersecurity researchers believe that the notorious Evil Corp has rebranded itself as Grief, the group that has claimed responsibility for a probable ransomware attack at The National Rifle Association (NRA). Grief posted 13 files to its news website last Wednesday after they claimed to have hacked the NRA. The gang is threatening to release more of the files if they're not paid, but no ransom demand was specified. NBC News reported that the files it saw were related to grants. The samples provided by the gang include blank grant proposal forms, a list of recent grant recipients, an email to a recent grant winner earlier this month, a W-9 form and the minutes from a September 24th NRA teleconference meeting.

Individual Impact: No consumer PII or financial data loss was disclosed in this breach as of press time.

Customers Impacted: Unknown

How It Could Affect Your Business: Data is of immense value to cybercriminals in the booming dark web data markets, and this data will appeal to many different cybercriminal operations.

United States: PracticeMax

Exploit: Ransomware

MoneyLion: Financial Services Platform

Risk to Business: **1.822= Severe**

That old favorite credential stuffing makes an appearance this week with an attack on the financial services platform MoneyLion. The Utah-based fintech company provides mobile banking services for borrowing, saving, and investing money. MoneyLion informed customers that "an unauthorized outside party appears to have been attempting to gain access to your account on the application using an account password and/or possibly email address that appear to have been potentially compromised in a prior event". The data breach notice outlined the attacks as taking place over the course of several weeks spanning June and July 2021. The company assured users that no information was stolen.

Risk to Business: **1.703= Severe**

In breach notification letters being sent on behalf of DaVita, Humana and Anthem, PracticeMax says the incident affected PHI including members' first and last name, date of birth, address, phone number, Social Security Number, member ID number and clinical data pertaining to services received through the VillageHealth program.

Individual Impact: No consumer PII or financial data loss was disclosed in this breach as of press time.

Customers Impacted: Unknown

United States: Schreiber Foods

Exploit: Ransomware

Schreiber Foods: Dairy Processor

Risk to Business: **1.442=Extreme**

Wisconsin-based dairy powerhouse Schreiber Foods said its plants and distribution centers are back up and running after a ransomware attack ground operations to a halt over the weekend. The company announced that a "cyber event" had disrupted operations at its processing and distribution centers after critical systems were knocked or taken offline. Schreiber uses a variety of digital systems and computers to manage milk processing, so this event impacted the entire dairy supply chain in the US. This is the latest incident in a string of massive production-impacting

Individual Impact: No consumer PII or financial data exposure was disclosed in this incident as of press time.

Customers Impacted: Unknown

How it Could Affect Your Business: More than 80% of reported security incidents in 2020 were phishing-related, making this the biggest cyberattack vector for every business.
